WASHINGTON, D. C.

DESCRIPTION OF UNITS

In June 1943 The Surgeon General appointed a board of officers to prepare, develop and implement the medical portion of the War Department's program for aid to civilian populations in liberated countries. This board has since its appointment made extensive and continuing studies of the medical, sanitary and veterinary requirements for liberated and occupied areas of Europe and the Pacific.

Actual use of these supplies in the areas which have been liberated or occupied for a period of over one year indicates that the estimate of requirements has been on the whole quite satisfactory.

The quantity and variety of the medical supplies furnished liberated areas are those considered essential to meet the basic needs of the area. In arriving at the quantity of medical items to be furnished, careful consideration has been given to the known prewar status of medical care, the estimated depletion of supplies, and the estimated destruction in each area for which supplies are to be provided. The policy is to provide supplies for relief and prevention of disease and unrest rather than for rehabilitation.

Medical, sanitary and veterinary items are assembled and shipped in unit assemblies or by item (operating personnel is not provided) according to the particular use for which they are planned. Sufficient supplies are included in each unit assembly to care for certain fraction of the population. It should be noted that supplies are shipped only on theater requisition. The following are the lists of supplies which have been developed for territories of the Pacific:

Basic Medical Unit: This assembly contains basic drugs, dressings, surgical instruments and accessories, and confinement supplies for expectant mothers.

Anti-Malarial Drug Unit: This assembly contains drugs for the treatment of malaria.

Hospital Units: These assemblies contain complete equipment for hospitals of 200 and 40-bed capacities. No cover is provided since the use of existing buildings is anticipated.

DESCRIPTION OF UNITS

General Dispensary Units: These assemblies are similiar to the 40-bed hospitals, but on a smaller scale and less beds.

Obstetrical Bag: This unit consists of hand portable kits containing basic obstetrical supplies for the use of trained midwives.

X-ray Equipment Unit: This assembly contains equipment for taking and processing diagnostic x-rays.

X-ray Supply Unit: This assembly contains expendable x-ray supplies for use with existing x-ray equipment.

Dental Equipment Unit: This assembly contains supplies and equipment to provide adequate dental treatment in the field.

Dental Supply Unit: This assembly contains a monthly supply of expendable items for use with the Dental Equipment Unit.

Basic Laboratory Unit: This assembly consists of laboratory equipment and supplies for use in epidemic studies and laboratory diagnosis of diseases.

Biological Reserve: This consists of a central reserve of biologicals to be requisitioned by item as required for the control of epidemics.

Malaria Survey Laboratory Unit: This assembly is for performing malarial surveys in tropical and sub-tropical countries.

Sanitation Equipment Unit: This assembly consists mainly of water purification equipment to furnish an emergency supply of potable water until such time as existing utilities can be repaired.

Sanitation Supply Unit: This assembly contains a monthly supply of water purification items for use in connection with the Sanitation Equipment Unit.

DESCRIPTION OF UNITS

Anti-Typhus Unit: This assembly was developed by the U.S.A. Typhus Commission and is for use in the prevention and control of typhus outbreaks.

Anti-Malarial Equipment Unit: This assembly contains sprayers and accessory equipment for malaria control.

Anti-Malarial Supply Unit: This assembly contains a monthly supply of insecticide, repellent, and oil for use with the Anti-Malarial Equipment Unit.

Rodent Control Unit: This assembly contains essential supplies and equipment for the control of disease bearing rodents.

Basic Veterinary Unit: This assembly contains basic essential drugs and dressings for the prevention and treatment of animals.

Veterinary Surgical Unit: This assembly contains basic instruments for the surgical treatment of animals.

Veterinary Laboratory Unit: This assembly consists of laboratory equipment and supplies for the diagnosis of diseases of animals and for the testing of foods of animal origin.

Veterinary Biological Reserve: This consists of a central reserve of vaccines, serums, and diagnostics for the prevention and treatment of epidemic-type animal diseases and should be requisitioned by item as required.

CALCULATION OF UNIT REQUIREMENTS FOR PACIFIC AREAS

Due to the classified nature of this information, it has been omitted from this document. However, requirements for specific areas and basis of calculation are available from the Office of The Surgeon General upon official request.

NOTES

1. The following items are authorized substitutes.

A. The substitute items listed below may be substituted for the equipment list items in the event the requisitioned item is not available.

<u>Requisitioned Item</u>	<u>Substitute Item</u>	<u>Ratio In Catalog Unit</u>
1136000 Chiniofon, 50 Tabs:	1168600 Diodoquin, 0.3 Gm	1/7 for 1
1268010 Mapharsen, 10 0.06- Gm. Ampules:	1N47200 Neoarsphenamine, 0.3 Gm:	4 for 1
1268015 Mapharsen, 10 0.6- Gm. Ampules:	1N47205 Neoarsphenamine, 0.6 Gm:	20 for 1
1488500 Totaquine, 1000 Tabs:	1084600 Atabrine, 1000 Tabs:	3 for 5
1N47205 Neoarsphenamine, 0.6 Gm:	1N47200 Neoarsphenamine, 0.3- Gm:	2 for 1

B. The substitute items listed below will be substituted for the equipment list item until entire stock of the substitute is exhausted.

<u>Requisitioned Item</u>	<u>Substitute Item</u>	<u>Ratio In Catalog Unit</u>
1046000 Agar, 1 lb:	1046500 Agar, granular, Bacto, 1 lb:	1 for 1
1104000 Bismuth, subcar- bonate, USP, 1 lb:	1N13520 Bismuth, subnitrate, USP, 1 lb:	1 for 1

NOTES

<u>Requisitioned Item</u>	<u>Substitute Item</u>	<u>Ratio In Catalog Unit</u>
1160900 Crystal Violet, 10 Gm:	1161000 Crystal Violet, Bacto, 10 Gm:	1 for 1
1208405 Fuchsin, Basic, 10 Gm:	1208410 Fuchsin, Basic, Bacto, 10 Gm:	1 for 1
1290700 Methylene blue, 10 Gm:	1290300 Methylene blue, Bacto, 10 Gm:	1 for 1
1494990 Wool fat, 1 lb:	1495000 Wool fat, Hydrous, 1 lb:	1 for 1
4351100 Milk Testing Appa- ratus, Quevenne Lactometer with Thermometer:	4351200 Milk Testing, Appara- tus, Quevenne Lacto- meter, without Ther- mometer:	1 for 1
7409300 Steel, Butcher's Hard:	7409000 Steel, Butcher's:	1 for 1
